

Future Looks

"In the end, what we have with the CoolIT Domino A.L.C. CPU cooler is the kind of product any tech journalist likes. That's the kind of product that does what it's supposed to do, does it extremely well, and does it for a remarkably cheap price."

"This is easily one of the cheapest and biggest bang-for-the-buck water coolers you can find out there. Bravo to CoolIT for their efforts. They have indeed earned our praise, and our Editor's Choice award."

Hardware Canucks

"We could go on and on about how compact the Domino is, or how it comes with the most elegant information system we have seen in a prebuilt WC loop; or even how it comes ready for 1366 systems. All of this is best summed up by saying the Domino is quite innovative while being a very good value if you want to get you feet wet with water cooling."

Guru 3D

"I'm impressed as to what 79 USD will buy you. The Domino ALC design is just flat-out excellent; the cooling is very decent and the options you get are excellent. So yes, CoolIT's attempt to introduce a good performance water cooler to the masses, for as little money as possible, is certainly a goal well achieved. The product costs as much as a high-end cooler, but the benefits are so much more diverse. Wherever you'll read a review about this product, I promise you .. it'll be a positive one."

"We will hand out (and we do it very rare) our "top pick" hardware award as there's no chance in hell you'd dislike this product."

Legit Reviews

"The performance of the Domino A.L.C. simply blew me away like no other cooler has in years."

"The CoolIT Domino A.L.C. is more than worthy of our Editor's Choice award and I can't wait to see what CoolIT Systems is designing for next year!"

Tweak Town

"As a pre-built liquid cooling loop the beauty is in the mechanics. Pre-built systems do not require maintenance, extensive setup or the hassles of component liquid cooled systems. The Domino A.L.C. system is a great place for people to start down the path of overclocking and liquid cooling. It allows you to get a taste of the performance without the high cost or risk; something that cannot be said for component systems."

Firing Squad

"CoolIT has really designed something special here, and they have the performance numbers to back it up. The Domino A.L.C. is an amazing device, chilling both our AMD and Intel platforms with relative ease"

"From how it's mounted, to how it operates, it appears that CoolIT has expertly designed a liquid cooler that should meet any enthusiast's needs, from the mild overclocker to the sound level obsessed gamer"

"The Domino A.L.C has earned our Editor's Choice Award for being an innovative, well engineered product that is priced and designed to compete amongst high-end copper heatsinks and custom CPU liquid coolers"

3D Gameman

"This product performs extremely well, is easy to install, and affordable."

"Considering the time it takes to install this unit and the cost, it has major bang for the buck"

Modders Inc.

"Overall I think that CoolIT Systems with the Domino is on its way to changing how every PC will cool the processor. With no worries about leakage or having to refill or maintain the cooling system like you do for water cooling."

Techgag

"CoolIT has really done their homework with this latest release and it shows in the performance. Any way I look at it, this cooler is a winner...I have no problem giving a strong 9 out of 10 rating. My expectations were surpassed and I can't see a single reason not to use it for your next build if you are looking for something more advanced than that lump of aluminum/copper that comes with a retail processor."

Tweak News

"CoolIt's Domino A.L.C. kit has a lot going for it. Not only is this a turnkey system that requires no assembly or maintenance, it is easily installed, has good cooling performance and is priced competitively with higher-end air coolers. The LED screen is attractive and informative but will, like the control button, be hidden behind a case panel most of the time and not easily accessed. The design is thoughtful and the materials and workmanship seem to be very good, and you won't find a liquid cooling system that is quicker or easier to install."

RB Mods

"The folks at CoolIT have done it again. The CoolIT Domino ALC CPU cooler is an impressive cooler that deliver top-of-the-line performance in a compact package that is very quiet at low speeds. I continue to shake my head in disbelief when I look how low my CPU temperature is thanks to the Domino; it really deserves the name "advanced liquid cooling". Also this cooler has a very attractive price (MSRP of \$79), which is comparable to a lot of air coolers on the market. Overall, the CoolIT Domino ALC is a well-designed product that provides all the benefits of liquid cooling in an easy-to-install package. I would give this product an RBMODs Recommended Award as a great cooling solution."

BCC Hardware

"It is a compact Liquid Cooling System that doesn't just stop at being small. It is big on features and performance while still keeping a very low price. In order to get this kind of performance and features from another Liquid Cooling System, you'd have to spend almost twice as much."

Think Computers

"For an inexpensive drop-in watercooling system, the Domino A.L.C.'s numbers are nothing to sneeze at. I saw temperature decreases in every test, and a significant drop in the overclock tests."

"The CoolIT is available directly from CoolIT for 79.99. That's cheaper than some air coolers. Definitely a value. ThinkComputers.org gives the CoolIT Domino A.L.C. a 9 out of 10 score."

Fudzilla

"CoolIT made sure that everything is nicely packed and assembled, so you're good to go straight out of the box, without pouring in water or such. The simplicity of installation, the price and its seemingly harmless make Domino A.L.C. appealing to broader audiences, even those who shiver at the mere notion of water in their computer."

"Domino A.L.C. is efficient, elegant and easy to mount. You can mount it on Intel's sockets 775 and 1366 as well as AMD's AM2 and AM2+. We have to admit that it made quite an impression on us and we can't help but reward it and sincerely recommend it. For the relatively low price you'll pay, you get a water cooling system that performs flawlessly and it qualifies as a great replacement for loud CPU cooling systems."

More Reviews...

Computer Power User: "If you're toying with the idea of liquid cooling but want to dip your toes in the water before cannon-balling into the deep end, check out the Domino A.L.C."

CRN.com – Channel Web: "With a retail price of \$79, the Domino A.L.C. costs about the same, if not less, than most of the high-end fan/heatsink solutions currently available. It is a quiet, relatively simple to install system that is a good option for those wanting the advantages of liquid cooling without the added expense."

Dragon Steel Mods: "If you're looking for a chance to get into liquid cooling then this is it, the Domino is an inexpensive and safe way for even the novice user to get started in liquid cooling."

Extreme Mhz: "It's design goes much further than just affordability. It's also a product that basically tells you that it's really OK and safe to venture into water-cooling. Their coolers are built around quality and there's really nothing to dislike, despite which option you take. The Domino A.L.C earns our recommendation. For such a remarkably compact and lightweight unit, it cools pretty damn well and was even capable of outperforming the bulky, heavy Koolance Aquian feature here for comparison."

Hardware Geeks: "Overall the Domino is a Kick Ass peice of equipment and we award it our 5 Star Kick Ass Award."

Hardware Secrets: "The biggest advantage of Domino ALC is the presence of a digital controller with an LCD display, feature not present on any competing product."

Nordic Hardware: "I for one am very impressed with what CoolIt has designed for \$79 , not only is the install fast and painless , the Domino delivered on its promise to keep your processor running nice and cool. This is one on the best cooling systems I have tested in a very long time, and it has better cooling performance that any air cooler out there. If you're into gaming or overclocking, then the Domino is the system for you."

Overclockers.com: "The CoolIT Domino is something truly innovative in the computer cooling market. It takes performance liquid cooling to a place it has never been before, into a price bracket that makes it truly appealing to people on a tight budget. If you're looking for an excellent CPU cooling solution for a very reasonable price, the CoolIT Domino is right up your alley. The fact is that the Domino - represents a fantastic value for your money."

Overclockers Club: "The fact that this cooler utilizes an all in one watercooling system makes it a great idea for someone who is looking to get away from air cooling and dip their feet in the pond of watercooling."

Pure Overclock: "As a self-contained liquid cooling setup for your beloved processor, the CoolIT Domino A.L.C. offers outstanding performance at a superb price, and is one of the best mainstream cooling solutions we've seen in quite some time. If you're looking to make the jump to water cooling without the hassle of a custom kit, the CoolIT Domino is your best move."
